#### Management Skills for New Managers

(2 days course) Conducted in Thai Language

This course has been developed to bring new managers or the leaders through the required interactive skills for managers so that they can develop knowledge and comfort in working with their direct reports and other staff. It will help them to determine their working situation, to learn and apply skills such as coaching to empower people and unlock potential of their direct reports, delegating work so that they have more time to do those tasks no one else can do, negotiating and communicating their new roles with others, and managing the performance of each one of their direct reports. We want them to become more effective managers/leaders while their direct reports will become more motivated and capable to help them to achieve their desired results. Using more coaching for their managerial style will help their staff to outline a plan of action with clear goals for improvement. They can achieve the results they want, build an unbeatable team, and everyone win! They will also learn the learning curve of their individual staff on a specific work task with both a level of knowledge about how to do work and a level of enthusiasm for that specific task.

#### Course outline:

- Reality facing managers
- Performance management

- Strategic thinking for managers
- Effective communication
- Learning phases on tasks with leadership style
